

LLDA BOAT STICKER PROGRAM

- **Each year LLDA sends out Boat/PWC Stickers to those members who rent community slips and for other members who utilize the launch ramps.**
- This measure was enacted to help the association keep accurate records of the watercraft moored in our community docks and/or those using our launch ramps liability and security purposes.
- The number(s) on your sticker(s) are on file with the association, along with your valid boat/watercraft state registration.
- You will not be sent a boat sticker if you do not have a valid registration on file. Expired registrations must be replaced and names must match those of the property owner.
- You may not transfer your LLDA boat sticker to another watercraft that is not in your name and on file with the Association.
- You may be the “co-owner” on a watercraft to obtain a slip and boat sticker.
- You can indicate the number of stickers needed when you fill in the information on your annual dues return form.
- You do not necessarily need a sticker unless you are renting a community slip, but you can request one if you regularly use the boat ramp and would like your watercraft recognized as belonging to a member of LLDA.
- Please contact us should you need to change your registration information on file.
- You can request more than one boat sticker if needed, provided you send a valid copy of *each* registration for *each* sticker requested.
- **Your sticker is to be placed on the side of your boat which typically faces the shoreline, next to your registration sticker. It must be visible below your boat cover.**
- Do not hesitate to contact the Association should you have any questions or you need more stickers.
- Thank you for your cooperation with this program.
